INTRODUCTION AND RECOMMENDED SCORES	p. 03
RELATIONSHIP BETWEEN EXPERIENCE AND CAPABILITIES	p. 04
CRITICAL AND RECOMMENDED CAPABILITIES—BY INDUSTRY	p. 05

HOW TO INTERPRET SCORES

So, you have just completed the OrgInsights Assessment or our 360 Assessment. Congratulations on completing the first step in your journey! Now that you have the results, the question is “what does it mean and how can I use this information to help myself in my career and to get a job.”

When interpreting the assessment results, there are two main things to look at:

Years of Experience/Role – Are you just starting out in your career or are you a Senior Leader?

Industry – Are you in Finance & Banking, an Engineering Firm, a Farm?

Depending on how long you have worked and the experience you have gained, as well as the position that you hold in your organization, there will be different expectations of capabilities required. When someone is first entering the market, there are lower expectations set and a handful of capabilities that are expected based on the industry they are interested in.

As you become more senior, the industry specific capabilities matter less and it's expected that you develop all the capabilities across the board as a competent level.

RECOMMENDED SCORES BASED ON LEVEL/EXPERIENCE

Below you will see the expected benchmarks that should be achieved depending on your years of work experience and role. As you gain more experience, you will be expected to score higher overall with CEOs and Presidents expected to score high marks across all categories due to the nature of their roles and the breadth of their scope.

THE RELATIONSHIP BETWEEN EXPERIENCE AND CAPABILITIES

As you enter the workforce and start your career, there are specific soft skills that will help you succeed and provide you a competitive advantage versus other candidates or employees. These are key capabilities that should be used in your resume as well during interviews to give you a competitive edge.

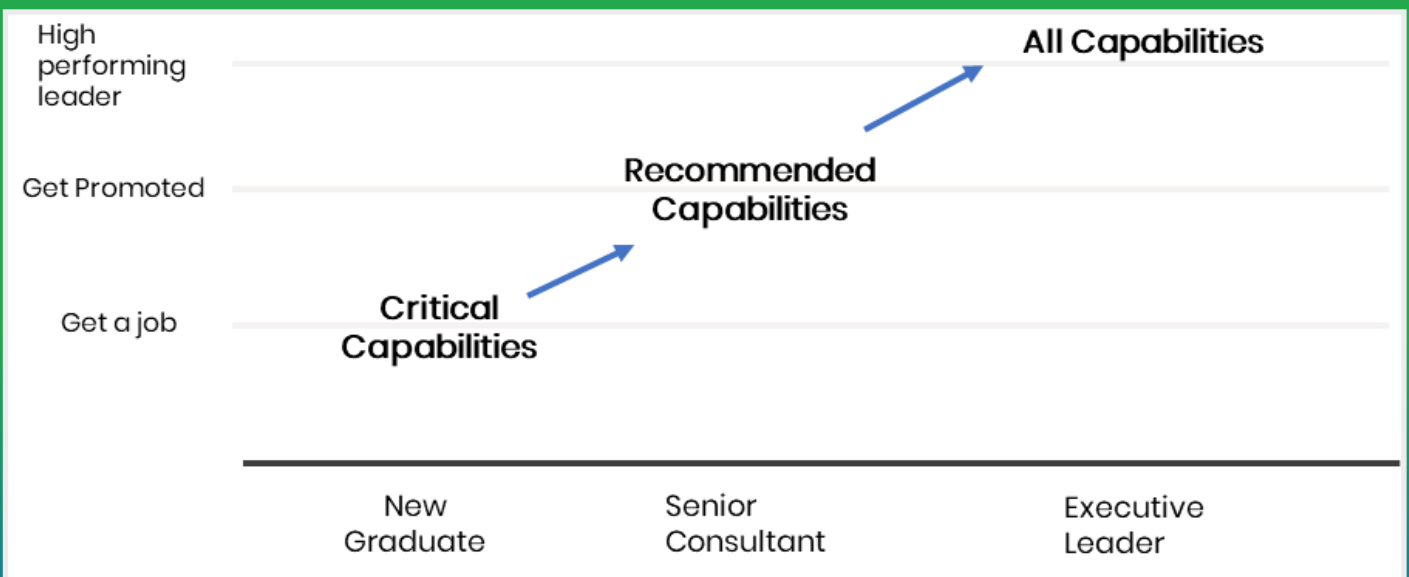

Below, based on your industry, we have flagged the capabilities that will help you stand out as you are starting your career or transition into a different industry. A few things to note:

Critical Capabilities: The most important capabilities for a career in this industry

Recommended Capabilities: capabilities recommended to help you be successful & grow in your role.

As you get more senior and gain experience, the expectation is, that you will need all capabilities developed to an acceptable level. At a Senior Executive level, there is an expectation, that you are strong in most if not all capabilities
