OrgInsights Capabilities Model

Listed below are the capabilities that we measure. These traits are displayed in leaders who have met their full potential.

LIMITS RISK

Maneuvers through complex situations and anticipates risks, while charting a path that outcomes and achieves solutions with appropriate governance.

- » **Scans for Politicals and Internal Impacts** Uses understanding of broad political, social and economic factors to maneuver through complex situations
- » **Manages Risk** Forecasts and Evaluates risk and identifies processes to mitigate the negative impacts while attaining objectives
- » **Reasons Critically and Solves Problems** Conducts root cause analysis to understand the problem and identify the practical and effective solutions
- » **Establishes Governance** Works with stakeholders to ensure accountability, ethical behaviour, fairness and transparency

EMBRACES AGILITY

Maneuvers through complex situations and anticipates risks, while charting a path that avoids negative outcomes and achieves solutions with appropriate governance.

- » **Navigates Policies and People** Leverages a deep understanding of how organizations work to achieve objectives through tactful and savvy approaches
- » **Thrives in Chaos** Maintains productivity in the face of change by adapting priorities and behavior
- » **Leads and Embraces Change** Scans for opportunities to drive positive change and overcome barriers by remaining open to new ideas and approaches
- » **Empowers Team Effectiveness** Creates resilient ecosystems by aligning and connecting team members through shared goals and resources

ACHIEVES EXCELLENCE

Takes ownership and applies fiscal accountability and sound judgement in managing resources in order to achieve the best project possible outcomes.

- » **Develops Talent** Actively supports self and team growth through investing in formal and informal development methods
- » **Evolves With Technology** Embraces the use of new technologies to improve efficiency, spur transformational change and seize opportunities
- » **Takes Ownership** Takes responsibility, faces criticism with courage, confronts problems and follows through on commitments
- » **Drives Performance and Productivity** Navigates competing priorities, aligns objectives, and defines tasks and milestones to achieve organizational goals

DEVELOPS RELATIONSHIPS

Builds strong relationships, creates safe spaces for diverse perspectives, and aligns the drivers of motivation with organisational priorities to promote productivity and build cohesion.

- » **Creates Alliances** Establishes relationships with key partners and builds and maintains engagement
- » **Demonstrates Empathy** Fosters collaboration by listening and withholding judgement to create safe spaces to share perspectives
- » **Influences Responsibly** Uses compelling arguments and a deep understanding of stakeholder motivations to gain support responsibly and ethically
- » **Focuses on Customers** Prioritizes client satisfaction by anticipating needs and listening without being defensive

SETS PURPOSE

Takes ownership and applies fiscal accountability and sound judgement in managing resources in order to achieve the best project possible outcomes.

- » **Inspires Others** Builds loyalty by clearly articulating a compelling vision the sincere intention of making a positive difference.
- » **Communicates Clarity** Creates shared understanding and meaning by delivering concise and well articulated communications to diverse groups
- » **Moves Data to Action** Uses market research and other analysis to build cohesive stories that connect the dots between data and calls to action
- » **Embraces Diversity** Brings different perspectives to the table, confronts bias and addressing systemic barriers to inclusion and accessibility

INTRODUCTION

Congratulations on completing the assessment with OrgInsights, you have taken the OrgInsights assessment and understand your strengths, hidden talent, and weaknesses. Now what? How do you interpret and leverage this information? How can you really use this information to get ahead of the competition?

The below section of the guide will help you leverage the information you have received to better develop your resume, interview as well as get the job!

WHAT IS INCLUDED

- A (this) guide to help you interpret your results
- OrgInsights Assessment and/or 360 Assessment (Depending on package selected)
- Your Industry & Development Report
- OPTIONAL: (if you provided enough profile information) – Additional Insights Report

TIPS ON UPDATING YOUR RESUME & INTERVIEWING FOR SUCCESS

UPDATING YOUR RESUME TO SHOW YOUR SOFT SKILLS:

Many candidates lose out on roles because you don't realize one important thing... There is more than your role specific skills, that will get you the job! If your resume cannot accurately reflect the soft skills you have, then your resume will just get lost in the hundreds of others. Here are steps on how to change that:

You may already be doing the work, now you just have to use the right language. As part of your role(s), you may have had to negotiate between different groups, listen to individuals and collect complicated requirements, lead a project with tons of members but your resume doesn't reflect the RIGHT language.

Ensure that your responsibilities that you have for your role reflect the soft skills you have seen in the LEADS model and that have been flagged as your strengths and/or hidden talents.

Example 1: You may already be in a technology role where you build documentation, procedure documents and guides. What that really is doing, is building governance documents and strategies. Call it out with the right terminology and give your work the attention it deserves.

Example 2: If you are an analyst/data, most analysts focus on the technical skills you have developed during this time and your proficiency in Excel, SQL, and other data analysis related technologies. Instead of focusing on more technical skill sets, focusing on the soft skills you've learnt such as your ability to reason critically and solve problems or your ability to use the data to build actionable plans.

SHOWING YOUR SOFT SKILLS DURING AN INTERVIEW

You have updated your resume with your soft skills, and it's helped you get your foot through the door and secure that interview. Now what??!! Well remember, when someone is calling you in for an Interview (online or in-person), this means you are interested in you and your background already. You are hoping that the person actually matches the resume. Don't sweat it, and just bring your real self!

When you are interviewing, make sure that you build in your soft skills in the examples and answers you provide. If someone asks you about your most significant accomplishment, make sure you can talk about it while expressing your ability to manage conflict, build relationships or any other soft skill that would be relevant.

Review the Industry page (further down in the guide) and understand what soft skills matter most to your potential employer and make sure you show that. Ex. you are interviewing for a social assistance/services role, well empathy is key to success so ensure that your examples talk to your empathetic nature.

HOW TO BE A S.T.A.R AND ANSWER INTERVIEW QUESTIONS LIKE A PRO

Want to learn the cheat code for acing an interview? In addition to talking and demonstrating your soft skills, there is a sure-fire method to get the job! Just remember that you just need use the S.T.A.R. technique for answering questions:

SITUATION – Before answering you need to make sure you set the scene and provide some context so the listener can understand the situation that you were dealing with.

TASK – Now that you have set the context, elaborate more on the challenge that you faced and the role you played.

ACTION – What actions did you take? Explain what you did in handling the situation and overcoming the challenge

RESULTS – What were the results of those actions? What did you achieve in the process and how did it take your organization/department or yourself further?

ENSURING THAT YOU ARE COMPETITIVE/BUILDING DEVELOPMENT PLANS

Understanding your capabilities levels is only one step in the process of getting a job. Many times, when you see your results, you may not necessarily be at the proficiency level expected for your role/seniority. How do you fix this issue? You get training and take courses to develop your skills and that's where OrgInsights can really help!

After you review your assessment results, ensure you check out the Industry & Development Report. In the last section, we provide videos, podcasts, courses and other great material that will help you develop your capabilities. All the content has been broken down by capabilities and type as well as level. You will see:

- » Beginner – Will give you the foundational knowledge you need to start developing the capability
- » Intermediate – Will build on the foundation and provide you a strong knowledge on the capability and how to use it every day
- » Advanced – Will help you become a SME and expert regarding the capability. This is what is expected from a qualified and experienced individual.

INTERPRETING ASSESSMENT RESULTS

The next section focuses on how to interpret the assessment results. Although most aspects of the assessment are straightforward, there are many cases where some help would be great in interpreting the results. Below you will see scenarios that may require some additional interpretation. When going through your results, a great area of focus to start is:

- » Focus on gaps between your self-assessment score and your OrgInsights assessment.
- » Figure out what benchmark you fall in and if your scores align to that benchmark (further in the guide)

FACTORS THAT CAN IMPACT BENCHMARK/SCORES

The below factors, are ones that are directly co-related to an assessment taker's score on the OrgInsights assessment in either negative or positive ways:

• **Years of Experience/Role** – *Are you just starting out in your career or are you a Senior Leader? People entering their career will score lower generally and that's expected. You still need to develop many capabilities while people with more experience most likely have had experience in these areas.*

- » **Industry** – Are you in Finance & Banking, an Engineering Firm, a Farm? Depending on what industry a person is coming from, means there may have been a focus on some skills versus others. This is not to say the assessment taker isn't capable, you just haven't had the experience.
- » **Size of Organization/Scope of Role** – People in the same role in different organizations may have different scopes and different requirements. This needs to be assessed through a discovery conversation. Ex. A manager in a large organization would generally have less scope of responsibilities than a manager at an organization with 500 people.
- » **Perspective/State of Mind** – Are you thinking with your current role in mind or future roles? Are you thinking as an Individual contributor when you should be putting on your manager hat? The viewpoint you answer from will impact your score.

Benchmarking – Breakdown of Levels

Below you will see the expected benchmarks that should be achieved depending on the years of work experience and role a person has. As a person gain's more experience, you will be expected to score higher overall with CEOs and Presidents expected to score high marks across all categories due to the nature of their roles and the breadth of their scope.

SCENARIOS AND HOW TO INTERPRET THEM

The next section will go over some scenarios that you might observe when reviewing the assessment for/with your client. This section is constantly being updated. If you find a scenario that has not been addressed, please reach out @ akeel.mohamed@orgpath.io and we will work to add additional details to the guide.

UNDERSTANDING THE GAP BETWEEN THE SELF-ASSESSMENT AND ORGINSIGHTS ASSESSMENT

When reviewing questions and the gap between the Self-Assessment and the OrgInsights assessment, anything within the range of 20% to -20% is generally acceptable. Many times, the difference between a person scoring themselves “always” and “most of the time” can result in a change of up to 20%.

In the below example 1, you will see the gap is -10% and -7% and their scores in both areas are generally high. This would not be something that would be flagged as an area of concern. You may want to review, but it’s not worth investing too much time.

2 Demonstrates Empathy

3 Influences Responsibly

In example 2, you will see the gap is more than -20%. Whether plus or minus, at those levels this is something you should start looking into. Is this an area of weakness? Do they know about this strength? Is there any value in paying more attention? Many times, when the gap grows larger than +/- 20% that indicates a blind spot or hidden talent.

2 Manages Risk

3 Reasons Critically and Solves Problems

ORIGINLIGHTS SCORE DOES NOT ALIGN WITH THE SELF-ASSESSMENT SCORE

Do the scores from the OrgInsights Assessment not align with the Self-assessment? Depending on the taker, this may happen a lot. What this means is: The assessment taker is very confident about their abilities when they self-assessed but when they are faced with a situation, their approach/preference doesn't align with their self-assessment. They react very differently in a real-life scenario than they believe they do.

Talk to the taker about the questions that are involved in their self-assessment score as well as the OrgInsights score. Find out why in a scenario, they scored lower. Is this because they mis-interpreted the question? Perhaps they don't understand the importance of the capability at their level? Maybe it's a weakness they need to focus on? The key is to identify why and understand if there is development required in the capability.

LINK BETWEEN QUESTIONS & CAPABILITY BEING TESTED ISN'T CLEAR

When reviewing the questions with candidates, sometimes they might come back and let you know that they don't think the question is relevant or that it doesn't represent their level. A few things to think about when responding to that question.

- » The benchmarks were built through the collection of several hundred assessments and in collaboration with multiple experts. As well, we review and update our benchmarks on an annual basis.
- » There has been thought put into all the questions to drive specific outcomes. Although it might not make direct sense, there is logic. Not seeing the co-relation, does not mean it's not true.
- » Behavioural Scientists that are certified by the APS drafted all questions. In addition, Mapien has been in the People Consultancy and Talent Psychometrics space for over 50 years and is one of the largest People Consultancies in Australia and the Asia-Pacific region.
- » If you are really not sure, reach out to the OrgInsights team @ akeel.mohamed@orginsights.io and we would be more than happy to provide you additional information and context.

GETTING EXPECTED ORGINSIGHTS SCORE BUT LARGE GAPS BETWEEN SELF-ASSESSMENT SCORES

Another scenario that happens occasionally (example 4) at lower levels (Manager and below generally) is that the assessment taker scores what is expected for their level in the OrgInsights assessment but scored themselves very high in the self-assessment. This many times is indicative to a person that believes their capabilities may be a lot stronger than they think.

To coach for this, it's important to point out that the current level that they may operate, although efficient, may have some development required still to operate at higher levels. This many times happens when you have a strong subject area manager, but they may not grasp the increase in overall scope and responsibilities that come with moving to a high-level role and how their area ties into a larger picture.

SCORING HIGHER THAN YOUR LEVEL

There are many times like example 5, that a person in a role will score higher in a capability than expected for their level. This is great! What this is indicative of, is that the assessment taker is very strong in a capability. It is important to note though, that being flagged with a strong capability in the assessment, does not mean they have demonstrated this yet in their role.

The goal of this assessment is to flag key capabilities you should focus on showcasing and/or developing. Knowing what capabilities to demonstrate is the first step, the second step requires the active use and demonstration of the capabilities to those you work with and in leadership level roles in the organization to ensure they can see your proficiency.

SCORING LOWER THAN EXPECTED IN PRESUMED STRENGTHS

There are occasions where you may score lower than you expected in certain areas that you expect to be strengths. Another aspect you need to look at is how a question may be interpreted and answered by specific populations. In the below example 6, the Leader who took the assessment scored low in Develops Talent. As a Leader of a successful organization, you were of course shocked!

In this example the reason they scored low in the Develops Talent section is the current organization they are in and the scenarios they are dealing with. In their role, they are constantly bombarded with decisions they need to make, Presentations to the Board, developing relationships with other industry leaders, transforming an organization and so much daily. For this reason, when they have time, they try to relax and stay away from challenging material. As well, in the organization, currently they are focusing on a transformation project that requires subject matter expertise. As a result, they would rather have people working to existing strengths.

In the above scenario, diving deeper into your scores allows you to understand why you answered the question. By diving deeper, based on the Leader's current situation, the scores are reasonable but as well, it's important to remind them that a key aspect to your long-term growth is through developing talent.

UNDERSTANDING THE CAPABILITIES THAT MATTER

THE RELATIONSHIP BETWEEN EXPERIENCE AND CAPABILITIES

As your client enters the workforce and starts their career (or is looking at moving up in their career), there are specific soft skills that will help them succeed and provide them a competitive advantage versus other candidates or employees. These are key capabilities that should be used in their resumes as well during interviews to give them a competitive edge

In this section, based on industry, we have flagged the capabilities that will help a person stand out as they are starting their career or transitioning into a different industry. A few things to note:

Critical Capabilities: Needed to secure a role in the industry and get your foot through the door.

Recommended Capabilities: capabilities recommended to help you be successful & grow in your role.

As a person get more senior and gain's experience, the expectation is, that they will need all capabilities developed to an acceptable level. At a Senior Executive level, there is an expectation, that they are strong in most if not all capabilities.

VISUALIZATION OF RELATIONSHIP

CAPABILITIES REQUIRED/ RECOMMENDED BASED ON INDUSTRY

Critical Capabilities to support services

Important Capabilities that will help you get ahead of the competition

Administrative and support services

LIMITS RISK	Reasons Critically and solves problems
